Postdoctoral Position in Vascular Biology Research

A postdoctoral position is available at the Feinberg Cardiovascular Research Institute, Northwestern University School of Medicine, Chicago to study the cellular and molecular mechanisms controlling vascular formation using mouse models and stem cell-based approaches. We are particularly interested in understanding the formation of the blood and lymphatic vasculature in development and disease and the role of Foxc transcription factors in this process. Potential candidates should have strong expertise in developmental biology or molecular/cell biology. Please send CV, a brief description of research interests, and the names of three references to:

Tsutomu Kume, Ph.D
Associate Professor of Medicine
Feinberg Cardiovascular Research Institute
