Postdoctoral Position in Gynecologic Oncology Research

Northwestern University has an opening for one postdoctoral position to lead a molecular biology project studying DNA methylation in ovarian cancer. The candidate must be well versed in molecular and cellular biology and have some expertise analyzing RNA and DNA sequencing. The candidate will use molecular techniques to identify novel prognostic markers of significance in ovarian cancer. Highly motivated candidates who recently obtained a PhD or MD degree and have a strong background in molecular and cancer biology are encouraged to apply.

Interested individuals should send their curriculum vitae, a brief description of their research interests, and the names of three references to:

Daniela Matei, MD
Professor
Department of Obstetrics and Gynecology
Northwestern Feinberg School of Medicine
