Postdoctoral Opportunities in Allergy and Immunology at Northwestern University
The NUAIR Training Program in Translational Research

The Northwestern University Allergy-Immunology Research (NUAIR) program is a NIH T32 funded training grant to provide training opportunities for MD, PhD or MD/PhD postdoctoral fellows in translational research in the area of Allergy-Immunology. Successful applicants will have the opportunity to join their choice of over two-dozen laboratories directed by mentors in the program. Projects should be translational in nature, i.e. involving human subjects or human derived materials, and the program has many very strong, NIH funded mentors. Trainees will typically have a primary mentor as well as a secondary mentor, one clinical and one laboratory based, in order to ensure excellent training in the clinical and laboratory elements of translational research. A list of mentors in NUAIR can be obtained on request; some of the mentors in NUAIR are listed at the NUAIR website: http://www.medicine.northwestern.edu/divisions/allergy-immunology/research/. NUAIR mentors are at the forefront of fields relevant to allergic diseases. Topics are wide ranging, but include pathogenesis, genomics, genetics, epidemiology, immunology and pharmacology of allergic and inflammatory diseases. Diseases of interest include asthma, food allergy, chronic rhinosinusitis, respiratory virus infections, hypereosinophilic disorders and others. A number of courses and educational opportunities are afforded to NUAIR fellows.

The positions will include one-year appointments, with renewal for a second year contingent on satisfactory performance. Positions are open immediately, and interested candidates are encouraged to apply at their earliest convenience. Applicants must be U.S. Citizens or Permanent Residents to be eligible for appointment. Interested applicants should submit a cover letter, curriculum vitae, representative publications and papers, and the names of three references, along with a statement of research interests, to Robert Schleimer, Chief, Allergy-Immunology at rpschleimer@northwestern.edu. Review of applications will begin upon receipt.

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
