Postdoctoral Research Position in Laimins Laboratory

A position for a postdoctoral research scientist is available in the Laimins Laboratory in the Feinberg School of Medicine to study the pathogenesis of high-risk human papillomaviruses, which are the causative agents of cervical and many oral cancers.

Areas of study include: role of DNA damage responses in viral life cycle, regulation of gene expression, innate immune responses and role of HPV in oropharyngeal cancers.

Skills that would be useful include expertise in cell culture, microscopy and molecular biology techniques. Start date is negotiable.
