Postdoctoral Position in Exocrine Pancreas Development and Plasticity

A POSTDOCTORAL POSITION is available to study pancreatic acinar cell differentiation and plasticity. The candidate will use available mouse models, embryonic pancreas explants, imaging techniques, ex-vivo ADM cultures, and in vitro and in silico approaches, to investigate the former processes. Highly motivated candidates who recently obtained a PhD or MD degree and have a strong background in mouse development and molecular biology are encouraged to apply.

Interested individuals should send their curriculum vitae, a brief description of their research interests, and the names of three references to:

Beatriz Sosa-Pineda, PhD
Associate Professor
Department of Medicine
Northwestern Feinberg School of Medicine, Chicago
beatriz.sosa-pineda@northwestern.edu
