Principal Investigator Positions Available  San Diego Biomedical Research Institute (SDBRI) invites applications for Principal Investigator (Faculty) positions at all levels. SDBRI is a newly established non-profit biomedical research institute located in a state-of-the-art facility in the Torrey Pines Science Park in La Jolla, California. The mission of the Institute is to conduct basic biomedical research to foster the discovery of causes, treatments, and vaccines relating to human diseases and the associated long-term complications. The environment at SDBRI is one in which innovation and collaboration are encouraged and promoted. Investigators in the fields of Immunology, Cancer, Infectious Disease, and Metabolic Syndrome are particularly encouraged to apply. Minimal qualifications include a Ph.D., M.D., or equivalent level degree, an established record of independent research accomplishment, and a history of obtaining significant extramural funding. Further information about the Institute, its leaders, and its scientists is available at www.sdbri.org. To apply, please send a Curriculum Vitae with a full list of publications, statement of research interests and plans, funding history, and names of three references to: hr@sdbri.org.
