Postdoctoral Position in Liver Development

A POSTDOCTORAL POSITION is available to investigate molecular mechanisms controlling liver progenitor specification and hepatocyte development in mammals. The candidate will use available mouse models, ESC/iPSC cultures, and other approaches, to study the former processes. Highly motivated candidates who recently obtained a PhD or MD degree and have a strong background in mouse development and ESC/iPSC methodologies are encouraged to apply.

Interested individuals should send their curriculum vitae, a brief description of their research interests, and the names of three references to:

Beatriz Sosa-Pineda, PhD
Associate Professor
Department of Medicine
Northwestern Feinberg School of Medicine, Chicago
beatriz.sosa-pineda@northwestern.edu

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes, including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
