Postdoctoral Position in Pancreatic Cancer Research

A POSTDOCTORAL POSITION is available to investigate the molecular bases of pancreatic tumor formation in mammals. The candidate will use available mouse models, 3D-cultures, pharmacological and other approaches, to identify mechanisms that promote the formation of preneoplasias and neoplasias in the pancreas, and the role of genomic instability in pancreatic tumor metastasis. Highly motivated candidates who recently obtained a PhD or MD degree and have a strong background in molecular and cancer biology are encouraged to apply.

Interested individuals should send their curriculum vitae, a brief description of their research interests, and the names of three references to:

Beatriz Sosa-Pineda, PhD
Associate Professor
Department of Medicine
Northwestern Feinberg School of Medicine, Chicago
