Postdoctoral Fellowship in Gastroenterology

The Division of Gastroenterology & Hepatology at Northwestern University is seeking a qualified individual for a newly available Postdoctoral/Research Associate position in the laboratory of Marie-Pier Tetreault.

Qualified applicants will possess a PhD, or MD/PhD in cell biology, molecular biology, immunology, cancer biology or related fields; and a strong track record of high-quality biomedical research.

The research program focuses the reciprocal contributions of the epithelium and the microenvironment to inflammatory diseases of the gastrointestinal tract. More specifically, our laboratory focuses on two key inflammatory pathways: the IKKβ/NFκB and STAT3 pathways. To define key factors regulating epithelial-epithelial and epithelial-stromal signaling in the esophagus, we employ transgenic and knockout mouse models as well as cell culture, multiple biochemical and molecular assays, histologic assays, and flow cytometry.

Previous familiarity with transgenic and knockout mouse models, as well as biochemical and molecular biological techniques is preferable. Northwestern University offers a highly stimulating intellectual and collaborative environment for cutting-edge research.

Applicants should email a cover letter with a brief statement of research interests, their CV, and list of references to Marie-Pier Tetreault at the following email address: marie-pier.tetreault@northwestern.edu

Contact Information:
Marie-Pier Tetreault, Ph.D.
Assistant Professor of Medicine
Division of Gastroenterology and Hepatology
Department of Medicine
Northwestern University – Feinberg School of Medicine
300 East Superior Street
Chicago, IL 60611
Office Phone: (312) 503-1915

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes, including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
