Postdoctoral Position in Epithelial Cell Biology

Postdoctoral fellow position is available in the laboratory of Dr. Sergey Troyanovsky to study the cell-cell contacts between epithelial cells. Enthusiastic candidates with recent PhD and expertise in molecular and cell biology are encouraged to apply.

Our laboratory has elucidated the specific mechanisms driving the formation of cell-cell junctions. Our next goal is to understand how the cytoskeleton and polarity proteins coordinate these mechanisms and eventually build the highly organized intercellular contacts. These studies have direct implication in understanding of abnormal morphogenesis in different pathologies including cancer. The laboratory has integrated a broad range of techniques including genomics, molecular biology, and live cell imaging.

Northwestern University is one of the top-ranked universities in the country with highly interactive scientific environment. The Feinberg School of Medicine known for its innovative teaching and pioneering research is located in the heart of Chicago downtown. Salary and benefits are competitive.
