Postdoctoral Position in Tumor Immunology
A postdoctoral position is available in the laboratory of Dr. Caroline Le Poole for a junior postdoc to (PhD or MD/PhD) to design immunotherapeutic options for the treatment of benign tumors. This will require an evaluation of candidate target antigens, and the design and testing of treatment combinations for conditions associated with chronic mTOR upregulation. Enthusiastic candidates with a recent PhD and expertise in immunology are encouraged to apply. Experience with in vitro and in vivo experimentation and/or molecular cloning is a plus. Research in the lab is focused on immunotherapy of (cutaneous) tumor and autoimmune conditions. The laboratory holds excellent cell culture, staining and imaging capabilities. Northwestern University is one of the top-ranked universities in the country with a highly interactive scientific environment. The Feinberg School of Medicine known for its innovative teaching and pioneering research is located in the heart of Chicago downtown. Salary and benefits are competitive. Send your CV and contact information for three references to
